Create custom questionnaires at the end of a course segment to find out how students enjoyed the course, the teacher or both. Generate reports and then make adjustments to the segment based on the feedback.

Full course information outlined for Students and Caregivers to make informed selections for their students pathways.

Help the At Risk: Find out which students felt they struggled with that course, How you can help them and why they gave the answers they did. Get a full in-depth picture of the students learning requirements.

 Generate PDF reports that actually show helpful data, easily identify what your teaching staff and students are excelling with, and where improvements can be made. Generate questionnaires and assign them to any student groups, year levels, course codes or tutor classes.
